

Response to the Inspection Report by the School

Since the School was found fully compliant with all regulations, there are no remedial actions we need to take.

Our responses to the Report's two advisory recommendations are as follows:

1. Ensure all marking meets the standard of the best

We regularly monitor marking by means of sessions when each Department reviews the marking of all its teachers. All Departments will carry out further reviews, together with spot-checking by the Deputy Head Academic, to identify any areas where marking is inappropriately perfunctory and to ensure that our marking policy is being fully implemented.

2. Monitor the use of worksheets to ensure that they consistently provide sufficient challenge to pupils.

All Departments will review their use of worksheets. New material will be introduced where existing worksheets are found to be insufficiently challenging.
